

The screenshot displays the USPTO AIR (Automated Interview Request) interface. The left pane shows a list of patent documents, categorized by status (Active, Pending, etc.). The right pane provides a detailed view of a selected document, including its title, abstract, and claims. The document title is "Controller for managing a buffer allocation in a home engine". The abstract describes a system for managing a buffer allocation in a home engine, including a controller and a buffer allocation unit. The claims section is partially visible, showing a method for managing a buffer allocation in a home engine.
